READS

THE MODULE AND THE PARTS INSIDE IT

HANDS ON

WHERE IT GOES

This module's object in colour, the rest of the kit in grey

SIZES THAT MATTER

Rules and commands: part of the 47 kB stub

Commands today: eight

Decision-wording rule: in the checker (R13)

HOW TO MAKE IT AND HOW IT FITS

1. Keep the agent rules and the session commands as plain text files: an agent reads them from the repository it works in, so they must live in the repository, not only in the package (RDK-DDR-003, change P2).

2. Setup writes them into a new repository; upgrade rewrites them and shows the difference before anything is kept.

3. Take the organisation and owner names in them from the identity record, so another team's agents get their own names.

Fits: part of the stub (joint 6); the cap they quote is the cap the gate enforces.

Check: after an upgrade the rule files match the new version and the difference was shown first.

INTERFACE VIEW

What the module reads, the parts inside it and what it hands on; not to scale
