REVISION HISTORY

Version	Date	Author	Change
0.2	2026-09-26	Amish Chadha	D5 reversed by Amish on 2026-09-26; portfolio license pair (CERN-OHL-S v2 and MIT) restored
0.1	2026-09-25	Amish Chadha	Recommendations accepted by Amish (DDR-002)

0002: Recommendations accepted

- **Date:** 2026-09-25
- **Status:** accepted. Every item below that carried a recommendation is "Decided by Amish, 2026-09-25: go with recommendation". Items with no recommendation stay "Proposed, awaiting Amish". D5 was reversed by Amish on 2026-09-26.

■ Context

On 2026-09-25 Amish wrote: "i accept all your recommendations, go with them across all repos." RDK-DDR-001 had adopted seven items (D1 to D7) for TRL 3 work, open for his review, and the TRL 3 review note (`docs/REVIEW.md`) proposed a route for two unmet requirements (R6 and R15). This record turns each of those recommendations into a decision, says what changed in the repository because of it, and lists what is still open.

TRL 4 remains on hold by Amish's instruction. A decision whose implementation is building, packaging, publishing or testing the tool is recorded as decided but on hold. Changes to the shared kit (`.kit/`) are not made inside a project repository; they are listed as cross-repo actions in `docs/REVIEW.md` .

■ Options considered

The options for D1 to D7 are in RDK-DDR-001 and in `docs/REVIEW.md` (session 2026-09-25, /populate). The routes for R6 and R15 are in RDK-REQ-001 v0.3, Table 3. Where a recommendation offered several options, the recommended option is the decision.

■ Decision

Table 1. Items decided on 2026-09-25.

#	Item	Decision	Status	What changed in this repository
D1	Distribution	Pip package <code>readykit</code> with a pinned <code>.kit/</code> stub, plus a GitHub template repository	Decided by Amish, 2026-09-25: go with recommendation. Build on hold (TRL 4)	Wording in RDK-PRC-001, RDK-REQ-001 (R10, R12), <code>bom/bom.csv</code> item 7 and RDK-DWG-001 notes. Nothing built
D2	Identity and branding	Organization name, website, repository owner, author and colors in <code>readykit.yaml</code> , with Design Molecule defaults	Decided by Amish, 2026-09-25: go with recommendation. Build on hold (TRL 4); kit change listed as a cross-repo action	R11 wording. RDK-CAL-001 v0.2 recounts the hard-coded identity after the site change: 13 occurrences of 5 values (was 13 of 4)
D3	Sheet sizes	Add ISO A3 (420 x 297 mm) beside ANSI B; ISO A2 later if asked for	Decided by Amish, 2026-09-25: go with recommendation. Kit change on hold (TRL 4)	<code>cad/src/model.py</code> already switches the sheet parameter between ANSI B and ISO A3; comment and RDK-DWG-001 notes now say "decided"
D4	Command-line interface	One <code>readykit</code> command (<code>init</code> , <code>check</code> , <code>render</code> , <code>media</code> , <code>upgrade</code>); present scripts kept as wrappers	Decided by Amish, 2026-09-25: go with recommendation. Build on hold (TRL 4)	R18 wording
D5	Licensing	Code under MIT; non-code content (documents, drawings, CAD, BOM, media) under CC BY-SA 4.0	Decided by Amish, 2026-09-25: go with recommendation. Applied, then reversed by Amish, 2026-09-26 (see below)	<code>LICENSE</code> held the CC BY-SA 4.0 legal code (was CERN-OHL-S v2); <code>project.yaml</code> <code>licenses.hardware</code> CERN-OHL-S-2.0 to CC-BY-SA-4.0 (key name kept so the website card still reads it) and tag <code>cern-ohl-s</code> to <code>cc-by-sa</code> ; README badge and Licenses section; <code>CONTRIBUTING.md</code> ; the <code>license</code> field of every controlled document; the title block of RDK-DWG-001 (Rev P2) and of the concept blueprint RDK-DWG-010
D6	Standards interoperability	Open Know-How 1.0 manifest export (R16)	Decided by Amish, 2026-09-25: go with recommendation. Exporter on hold (TRL 4)	R16 wording
D7	TRL 3 evidence for a software project	Massing STEP and STL, pipeline GA sheet, measurement note, budget \$0	Decided by Amish, 2026-09-25: go with recommendation	Already in place; no further change. <code>budget_usd</code> stays \$0
D8	Route for R6, check coverage	Add at least six of the eight missing checks in RDK-REQ-001, Table 4	Decided by Amish, 2026-09-25: go with recommendation. Build on hold (TRL 4); kit change listed as a cross-repo action	R6 route in RDK-REQ-001 Table 3

#	Item	Decision	Status	What changed in this repository
D9	Route for R15, documentation	Write the getting-started guide together with the package	Decided by Amish, 2026-09-25: go with recommendation. On hold with D1 (TRL 4)	R15 route in RDK-REQ-001 Table 3

Table 2. Items still open.

#	Item	Status
O1	Name "ReadyKit" for PyPI and GitHub. No recommendation was made.	Proposed, awaiting Amish
O2	Pilot users: a university lab, an open science hardware group or a startup. No preference was stated.	Proposed, awaiting Amish
O3	Windows: native support required, or WSL2 enough? No recommendation was made.	Proposed, awaiting Amish
O4	Decision-wording check (R13): generic, or tied to the portfolio phrase? No recommendation was made.	Proposed, awaiting Amish

D5 reversed, 2026-09-26

On 2026-09-26 Amish wrote: "apply the same MIT license pairing across the board for all repos."

D5 reversed: decided by Amish, 2026-09-26. Keep the portfolio license pair (CERN-OHL-S v2 and MIT) on every repo for consistency.

What changed in the repository:

- `LICENSE` : the CC BY-SA 4.0 legal code replaced by the CERN-OHL-S v2 text, copied verbatim from the FieldNode repository. `LICENSE-SOFTWARE` stays MIT.
- `project.yaml` : `licenses.hardware` CC-BY-SA-4.0 to CERN-OHL-S-2.0; tag `cc-by-sa` to `cern-ohl-s`.
- `README.md` badge and Licenses section, and `CONTRIBUTING.md`, match the other repos again.
- The `license` field of every controlled document is CERN-OHL-S-2.0 again: RDK-PRB-001 v0.4, RDK-PRC-001 v0.5, RDK-REQ-001 v0.5, RDK-CAL-001 v0.3, RDK-DDR-001 v0.3 and this record, v0.2. The precis and problem statement describe the portfolio pair.
- Title blocks: RDK-DWG-001 Rev P2 to P3 and the concept blueprint RDK-DWG-010 Rev P2 to P3 carry CERN-OHL-S-2.0. The subclass of `drawing.Sheet` in `cad/src/concept_media.py` that forced the content license onto the blueprint was removed; the kit default applies. Drawings, media and PDFs regenerated.
- `bom/bom.csv` line 7 describes the license pair.

Consequences

- `project.yaml` : `licenses.hardware` and one tag change (D5), both restored on 2026-09-26 when D5 was reversed; DDR-002 added to the TRL evidence list. `budget_usd` stays \$0, and the pitch and problem are unchanged, because no recommendation touched them. `trl` and `trl_target` stay at 3.

- Controlled documents revised: RDK-PRB-001 v0.3, RDK-PRC-001 v0.4, RDK-REQ-001 v0.4, RDK-CAL-001 v0.2 and RDK-DDR-001 v0.2. RDK-DWG-001 moves to Rev P2 because its title block license and notes changed; the geometry is unchanged.
- Requirement status is unchanged at 8 met, 8 not met, 0 at risk and 2 not verifiable. The eight unmet requirements are features that the decisions above define but that TRL 4 would build.
- TRL 4 remains on hold. Nothing in this record authorizes building, packaging, publishing or testing the tool.
