

REV	DESCRIPTION	DATE	BY
P1	Making sketch for the prototype build plan	2026-10-01	AC
P2	Decisions of 2026-10-02 carried in (CI platforms, Python range, identity phr...	2026-10-02	AC

READS

- Claimed TRL and target (project file)
- Evidence files for each level
- TRL cap (phase file)
- Still-open phrase (identity file)

THE MODULE AND THE PARTS INSIDE IT

TRL gate and badge

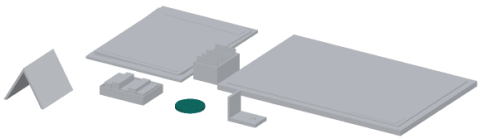

Evidence rules for TRL 1 to 6

Phase cap rule

Badge writer (README line and PDF cover)

HANDS ON

- Pass or fail for the claimed TRL
- README badge line
- TRL on every PDF cover

WHERE IT GOES

This module's object in colour, the rest of the kit in grey

SIZES THAT MATTER

- Evidence rules: TRL 1 to 6 today
- Badge: one line, rewritten only when the TRL changes
- Cap: TRL 3 in this portfolio phase

HOW TO MAKE IT AND HOW IT FITS

1. Carry over the evidence rules for TRL 1 to 6 and the phase cap.
2. Add the badge writer (RDK-DDR-003, change P5): it writes the TRL badge line at the top of the README from the claimed TRL, so the badge can no longer disagree with the project file.
3. Add the decision-wording rule of R13: a decision written as made with no owner and date fails; the still-open phrase comes from the identity file, default Proposed, awaiting.
- Fits: reads the reader's record (joint 1); the badge line and the PDF cover take the same TRL value (joint 3).
- Check: a TRL claimed one level above its evidence fails; the badge changes when, and only when, the TRL changes.

INTERFACE VIEW

What the module reads, the parts inside it and what it hands on; not to scale
